

# Software Release Notes

## CK3 Series v 3.45

Windows Mobile 6.1 Classic (Premium)

### Overview

Updated SSPB to support CK3Z configurations, ITE version 1.30 and greater, and Intermec Browser version 1.10.

### Supported Hardware

All CK3A/CK3B/CK3N/CK3J/CK3Z configurations.

### Version numbers

| Component                           | Current Version | Previous Version |
|-------------------------------------|-----------------|------------------|
| OS                                  | 3.45.26.0031    | 3.45.26.0031     |
| SSPB (SmartSystems Platform Bundle) | 6.20.33.0480    | 6.20.33.0477     |

| SSPB Components (SmartSystems Platform Bundle) | Current Version                | Previous Version               |
|--|--------------------------------|--------------------------------|
| IVA cab file                                   | IVA_5.04.70.2822               | IVA_5.04.70.2822               |
| Intermec Settings                              | Intermec_Settings_5.50.08.0891 | Intermec_Settings_5.50.08.0891 |
| Bluetooth cab file                             | 5.04.40.2796                   | 5.04.40.2796                   |
| Funk Supplicant cab file                       | FS_2.01.02.0297                | FS_2.01.02.0297                |
| Wavelink Enabler                               | 4.06-15                        | 4.06-15                        |
| InstallSelect cab file                         | IVA_5.06.72.3254               | IVA_5.06.72.3254               |
| Intermec DHCP cab file                         | 1.2.6                          | 1.2.6                          |
| IDL cab file                                   | CESDK_3.02.00.1368             | CESDK_3.02.00.1368             |
| Printer Configlet cab file                     | 2.0.0.34                       | 2.0.0.34                       |
| SR09022001_KEY_CK3WM61_ALL                     |                                |                                |
| SR09030600_AUD_CK3WM61_ALL                     |                                |                                |

## **New Functionality**

- Added support for CK3Z configurations
- Installation support for ITE version 1.30 and greater
- Installation support for Intermec Browser 1.10

## **Defects Fixed In This Build**

None

## **SRs Included In This Build**

SR09022001\_KEY\_CK3WM61\_ALL  
SR09030600\_AUD\_CK3WM61\_ALL

## Additional Information

The CK3 series handheld computer users' manual can be located at:  
[www.intermec.com](http://www.intermec.com) | Support | Manuals

### Installation Instructions

SSPB – Please see the document included with the SSPB bundle

OS – Please see the document included with the OS bundle

### SmartSystems Upgrade

Smartsystems Console 3.40 or higher must be used for upgrading and configuring CK3 WM 6.1 devices.

### 802.11d Support

CK3 Windows Mobile 6.1 supports 802.11d. For more information on 802.11d support, please see the 802.11d reference documents located in Knowledge Central (<http://intermec.custhelp.com>) and/or posted on the CK3 Launch Kit sites located on the GS&S website.

The configured Country Information Element can be seen in ISpyWifi on the main tab. (Iconnect->Wireless->Status->Advanced)

To use a device in ad-hoc mode, the device must first be connected to an 802.11d enabled access point or be scanning for an 802.11d AP so the operating Country Information Element can be received.

### SR and User Content Install

The SmartSystems transfer agent has been updated to allow for automatic SR installation on cleanboot and for custom user install steps.

#### SR Install

Cabfiles placed in a \Flash File Store\SSPB\Srs folder will be installed after the SSPB is installed on a clean boot.

The process of a cleanboot is now: *initial boot* -> SSPB install -> *reboot* -> DCE install -> SRs copied to cabfiles -> *reboot* -> SRs installed -> *reboot if required*

#### User Content Install

The SmartSystems transfer agent will now look for a folder called UserAutoInstall on the flash file store then proceed to execute any *\_sstransferagent.xml* located in that folder. This allows users to hook into the transfer agent install process and have applications or configurations applied on a clean boot. This *\_sstransferagent.xml* needs to be created and it is recommended to use the one located in FFS\SSPB as a starting template.

Transferagent will check for the xml file each time the system boots but will only execute the file one time once found.

The process of a cleanboot is now: *initial boot* -> SSPB install -> *reboot* -> DCE install -> SRs copied to cabfiles -> User content xml run -> *reboot* -> contents in \cabfiles installed -> *reboot if required*

## Errata

| ID             | Description Summary   | Systems           |
|----------------|---|-------------------|
| 27662          | Connecting BT devices may display “Cannot Connect” error message after pass code is entered. The device is actually connected and no additional action is required.   | Bluetooth         |
| 28711          | ITE demo license expires on handheld reset.   | ITE               |
| 28812          | It is necessary to install all wireless security certificates using Profile Wizard in Funk Security mode before switching to the Microsoft Supplicant. If certificates are not installed an error will be seen when trying to import certificates from Intermec Settings. | 802.11            |
| 30194          | Reconnecting to an SR30 after a resume may take 12+ seconds.  | Data Collection   |
| 29811          | It is necessary to enter the device name for Printer\Printer\BTcom in order to save changes to BK file in Intermec Settings.  | Intermec Settings |
| 29969<br>30176 | Alphanumeric barcodes scanned into RDP connections may not be displayed correctly.  | Data Collection   |
