

PrintSet Configuration Utility Release Notes

Version 4.83

Overview

This software release focuses on added functionality and enhancements for PrintSet 4.

Please refer to the online help or the printer user manual for additional information on the features and use of PrintSet and your printers.

Supported Printers and Version Numbers

Here is a table of the printers supported.

Family	Model Names
Industrial	PM4i, PX4i, PX6i, PF2i, PF4i, PD41, PD42
Desktop	PF8t, PF8d
Mobile	PB21, PB22, PB31, PB32, PB42, PB50, PB51, PW50

Version 4.83 Key Features

New Functionality

EAP/TLS Support

We've added EAP/TLS support for the PB21, PB22, PB31, PB32, PB50 and PB51 printers in Fingerprint, IPL and ESC/P languages.

The Wireless Setup Wizard now supports EAP/TLS.

New WiFi Module

The WiFi module in the PB21, PB22, PB31, PB32, PB50 and PB51 printers have been updated to meet new EU 300328 regulations. This required a change of chipset, which changed the behavior of our wireless setup screens and wizards. Depending on the chipset in your printer, the wireless screens and wizards will look slightly different.

Fixed Defects

Certificate download in ESC/P

We fixed issues with downloading certificates under certain circumstances in ESC/P.

Parsing SSIDs with Spaces

PrintSet can now deal with SSIDs containing the space character (ASCII character 32).

Error code 61 setting PAC for EAP/FAST

We fixed an issue with this error code appearing.

About Upgrading PrintSet 4

You should check for periodic updates to PrintSet 4. Updated versions can include bug fixes or additional features that may be useful.

- If you are upgrading from PrintSet v4.70 or later, the installation wizard will uninstall v4.70 before it installs v4.83.
- If you are upgrading from another version of PrintSet (v4.60 or earlier), you must manually uninstall PrintSet before you install v4.83.

To upgrade PrintSet

1. Visit the Intermec website (<http://www.intermec.com>) and then navigate to your printer product page.
2. Click the Downloads tab. In the Device Configurations table, download PrintSet v4.83.
3. Use the installation wizard to install PrintSet v4.83.
