2. Installation Notes	1
3. New Functionality Available in Version 1.00	2
4. Issues Fixed In This Version.....	2
5. Known Issues	2
6. No longer supported	2

1. Version Information

- This version of the Data Collection Web API is supported on Intermec Windows Mobile 6.5, Windows CE 6.0, and Android based computers.
- Windows Mobile 6.5, and Windows CE 6.0 Requirements
 - Intermec Browser or Intermec HTML5 Browser to run the Web application.
 - For Intermec Browser the browser engine must be: HTML5
 - The NPAPI plug-in, npBarcodeReaderPlugin.dll, must be installed in the Plugins subfolder of the browser installation folder.
- Android Requirements
 - Default Android web browser.
 - You must enable the web access feature on the Android computer. Open the Android Settings application. Navigate to Scanners > Security > Web access. Select the check box next to the Web access setting.
 - You must disable the Virtual Wedge feature on the Android computer. Failure to do so may result in receiving input twice due to a different Virtual Wedge implementation than Windows Mobile. Open the Android Settings application. Navigate to Scanners. Slide Virtual Wedge to off.
