

Upgrading the DCS 301 to Software v1.2

This instruction sheet explains how to upgrade your DCS 301 to software version 1.2. Before you can upgrade the DCS 301, you need

- the upgrade CD-ROM for software v1.2.
- the IP address for your DCS 301.
- Internet Explorer 4.0 or higher or Netscape Communicator 4.5 or higher.

Before you upgrade the DCS 301, you need to back up your configuration and move the configuration files off the DCS 301. For help, see the *DCS 301 User's Guide* (Part No. 070284) that shipped with the DCS 301.

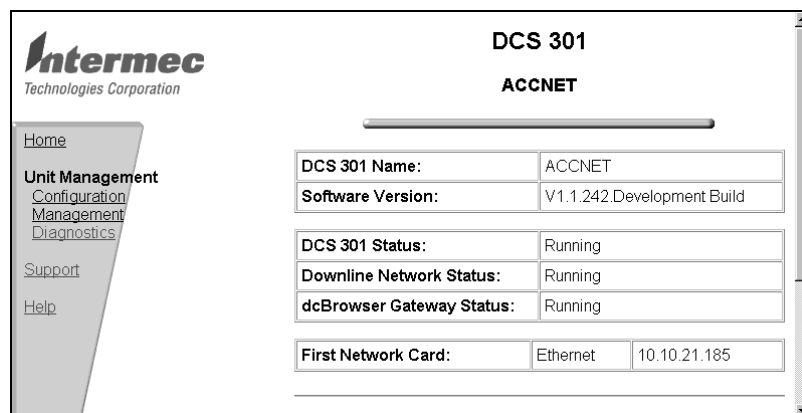

To upgrade the DCS 301

1. Turn on the DCS 301.
2. Insert the upgrade CD-ROM into the DCS 301 CD-ROM drive.
3. On your PC, start your Web browser.
4. In the Address field (Internet Explorer) or the Location field (Netscape Communicator), type:

`http:// dcs301ip`

where *dcs301ip* is the DCS 301 IP address.

5. Press **Enter**. The DCS 301 home page appears.

6. Click Management from the menu on the left side of the screen. A security screen appears.

7. In both fields, type:

INTERMEC

The DCS 301 Management page appears.

Manage Data Collection Server Status		
DCS 301:	Running	<input type="button" value="Reboot"/>
Downline Network:	Running	<input type="button" value="Stop"/>
dcBrowser Gateway:	Running	<input type="button" value="Stop"/>

Advanced Management	
Back up the current configuration.	<input type="text"/>
Create a backup copy of the	<input type="button" value="Results"/>

8. Scroll down to the Upgrade button and click the Upgrade button.

9. Follow the instructions that appear on the screen.
