

CK61 (NI) Compliance Insert

Important Operating Instructions

The Model CK61 Non-Incendive (NI) mobile computer has been qualified by Underwriters Laboratories Inc., to the requirements of the USA and Canada for use in Class I, Division 2-Groups A, B, C, D; Class II, Division 2-Groups F and G; Class III, Division 2, and Non-Hazardous locations only. The CK61NI has a T6 temperature code.

This product carries the following approvals. The users of this product are cautioned to use accessories and peripherals approved by Intermec Technologies Corporation. The use of accessories other than those recommended, or changes to this product that are not approved by Intermec Technologies Corporation, may void the compliance of this product and may result in the loss of the user's authority to operate the equipment.

Warnings and Cautions

Caution: This marking indicates that the user should read all included documentation before use.

Attention: Ce marquage indique que l'utilisateur doit, avant l'utilisation, lire toute la documentation incluse.

Warning: Explosion Hazard—Substitution of components may impair suitability for Division 2, Class I, II, and III locations.

Note: This unit has no operator replaceable parts other than the battery pack. Repair of the CK61NI unit must be performed by trained Intermec service personnel.

Warning: Explosion Hazard—Batteries must be changed or charged in an area known to be non-hazardous. Use ONLY Intermec battery pack Model AB11.

Note: From time to time additional battery packs may be added to the qualifications of the CK61NI. Contact your local Intermec representative if AB11 is no longer available as a replacement battery pack.

Caution: The battery pack used in this device may present a fire or chemical burn hazard if mistreated. Do not disassemble, heat above 100°C (+212°F) or incinerate. Dispose of used battery packs promptly. Keep away from children.

The following additional warnings and cautions must be observed for the safety of the operator and others in potentially hazardous locations:

- The CK61NI must only be used when the ambient temperature is between -20°C and +50°C (-4°F and +122°F).
- The CK61NI may NOT be connected to any of its available accessories while in potentially hazardous locations. This includes anything that uses the communications docking connector, headset, or microphone jacks. All allowed connections must be made while outside of the potentially hazardous location.
- The use of CompactFlash, Secure Digital, and SIM Cards in the CK61NI while in potentially hazardous locations is permitted as long as these cards are not removed or changed while in the hazardous location.
- Any connector cover removed while in ordinary locations must be reinstalled prior to entering a Class II or III potentially hazardous location.

FCC Digital Emissions Compliance

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the radio or television receiving antenna.
- Increase the separation between the computer equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the radio or television receiver is connected.
- Consult the dealer or an experienced radio television technician for help.

Specific Absorption Rate (SAR)

Radio Wave Exposure and Specific Absorption Rate (SAR) Information

The FCC permits a maximum SAR value of 1.6 W/kg. For body-worn operation, the highest SAR value for the Model CK61NI, as tested by Compliance Certification Services, is 0.38W/kg (2.4 GHz); 0.61 W/k (5.3 GHz); 0.49 W/k (5.8 GHz).

This product has been tested and meets the FCC RF exposure guidelines when used with the Intermec accessories supplied or designated for this product. Use of other accessories may not ensure compliance with FCC RF exposure guidelines.

Canadian Digital Apparatus Compliance

This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations.

Conformité aux normes canadiennes sur les appareils numériques

Cet appareil numérique de la class B respecte toutes les exigences du Règlement sur le matériel brouilleur de Canada.

Battery Information

Caution

Caution: The battery pack used in this device may ignite, create a chemical burn hazard, explode, or release toxic materials if mistreated. Do not incinerate, disassemble, or heat above 100°C (212°F). Charge only with Intermec Models AC4, AD3, AD4, AD5, AD6, and AV3. Do not short circuit; may cause burns. Keep away from children.

Use only Intermec battery pack Model AB11. Risk of fire or explosion if incorrect battery pack is used. Promptly dispose of used battery pack according to the instructions.

Attention: Le bloc-plis utilisé dans cet appareil peut prendre feu, constituer un risque de brûlure chimique, exploser ou dégager des substances toxiques s'il est manipulé de façon inappropriée. Ne pas jeter au feu, démonter ou chauffer à plus de 100°C (212°F). Ne charger qu'avec les dispositifs Intermec AC4, AD3, AD4, AD5, AD6, et AV3. Ne pas court-circuiter; cela pourrait causer des brûlures. Garder hors de la portée des enfants.

N'utiliser que le modèle de bloc-plis Intermec AB11. L'utilisation d'un mauvais bloc-plis pourrait constituer un risque d'incendie ou d'explosion. Mettre rapidement au rebut tout bloc-plis usé, conformément aux instructions.

Battery Recycling Information

Li-ion

Li-ion

This product contains or uses a lithium ion (Li-ion) main battery. When the battery reaches the end of its useful life, the spent battery should be disposed of by a qualified recycler or hazardous materials handler. Do not mix this battery with the solid waste stream. Contact your Intermec Technologies Service Center for recycling or disposal information.

Ce produit contient une batterie principale d'ions de lithium (Li-ion). Lorsque la batterie atteint la fin de sa durée de vie utile, la batterie usées doivent être mises aux rebuts par un agent de recyclage ou un manipulateur de matériaux dangereux agréé. Il ne faut pas mélanger la batterie aux autres déchets solides. Pour plus d'informations sur le recyclage ou la mise aux rebuts, contacter votre centre de services Intermec Technologies.

Note: In the U.S.A., the EPA does not consider spent Li-ion batteries as hazardous waste.
