Communications Adapter Instructions

## About the AN3 Communications Adapter

The AN3 provides Ethernet and USB connectivity to a 751G Mobile Computer when the AR4 accessory is installed on the computer.

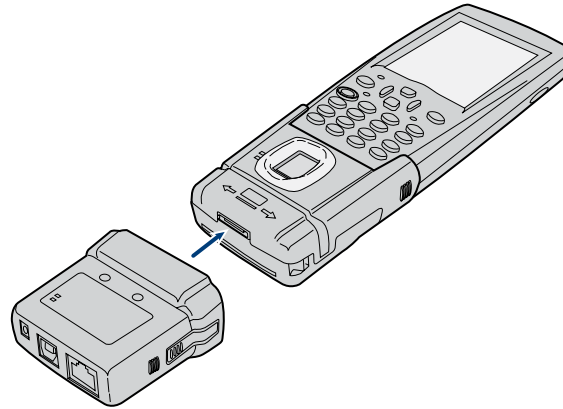

The AN3 is powered by the computer. When the AN3 is installed, you can also use an external power supply (P/N 851-065-005 or 851-065-105) to operate and charge the computer without removing the AN3.

**Caution:** See Compliance Insert for use restrictions associated with this product.

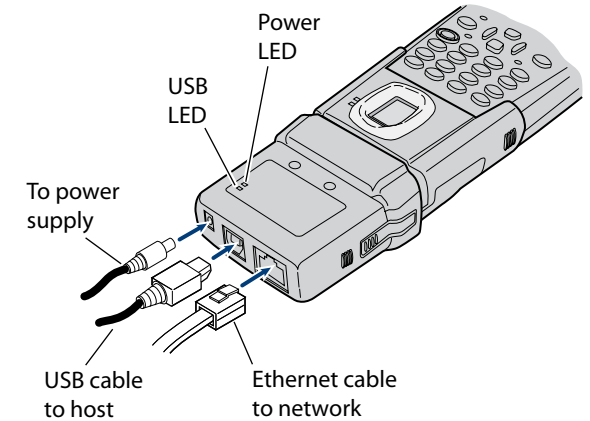

## Installing the AN3

Slide the AN3 onto the AR4 until the adapter snaps into place.

**Note:** The AR4 fingerprint imager and card readers are disabled when the AN3 is installed.

## Connecting the AN3

When you connect the external power supply or turn on the computer, the Power LED turns green. When you connect the AN3 to a USB host such as a desktop PC, the USB LED turns green.
