

Quick Start
Guide

Intellitag
ID Cards

Instructions

1. Hold the Intellitag[®] ID card horizontally in front of the antenna using your fingers and thumb or by allowing the card to hang as shown in the illustration.
2. Ensure the logo side of the card is exposed to the antenna, and your hand or fingers are not between the card and the antenna.
3. For best performance, it is recommended that the card be held toward the antenna at least 2 inches away from any large metal objects. Metal objects might keep the card from being read properly.
4. The card reads best at a distance of 1 to 6 feet from the antenna.
