Mobile DC-DC Uninterruptible Power Supply

Intermec

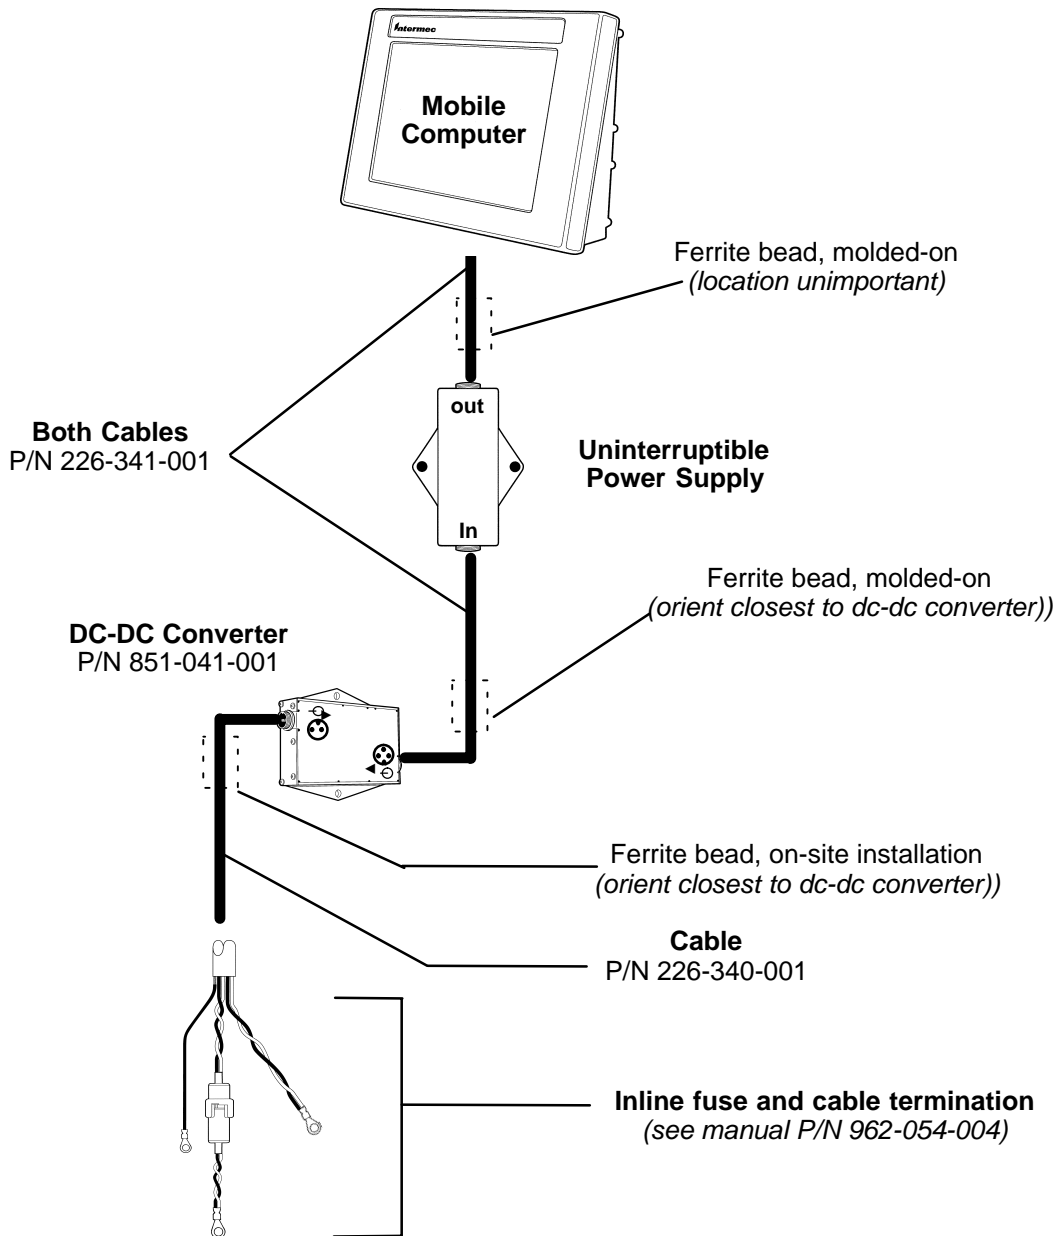

P/N 962-054-025 Revision A

A **UNOVA** Company

Introduction

This block diagram shows the power connections for including an uninterruptible power supply (UPS) on electric-powered vehicle installations. Mounting hardware is the same as for the DC-DC converter (see *Installation Manual P/N 962-054-004* for details).

Battery Information

The UPS battery requires 3-4 hours to become fully charged. Remove the UPS cover to access the battery for replacement.
